VISION

Introduction

MV-CL086-91GC camera adopts CMOS sensor to provide high-quality image, and uses GigE interface to transmit images in real time. It adopts multiple ISP image algorithms and functions, and supports external trigger modes like line trigger, frame trigger, and trigger-width exposure.

Key Feature

- Supports image compression mode, TDI, trigger-width exposure, RGB true color etc.
- Supports manual adjustment for Gamma correction, white balance, PRNUC correction, LUT, black level, space correction, etc.
- Adopts bi-directional I/O hardware design.
- Compact design and flexible installation.
- Compatible with GigE Vision V2.0 and GenICam standard.

Available Model
